Title: WEAVING

Author: Carlyn

---

This is a complete sourcebook for a variety of patterns. Included are patterns for clothing, blankets, quilts, and sheets. The introduction even includes a section on weaving one's own cloth.

...take the bale of wool and stretch it out across the wheel to make the thread. Once that is done, pull the thread across the loom and begin weaving. Shortly thou wilt have a nice stretch of cloth from which canst make a variety of useful things. For variation, use different colored threads on the loom to create exciting patterns.
